B. Project description and analysis

This application is a request for a zoning district change on a parcel from A-1A to COR-1 zoning designation. The application was submitted concurrently with a Future Land Use Map change from Rural Density Residential to Commercial Office/Residential (COR) future land use. The proposed change is on 9.54 acres, located on the intersection of SE Willoughby Blvd and SE Darling St, in Stuart.

Zoning District	District Purpose
CO (Commercial Office District)	The CO district is intended to implement the CGMP policies for lands designated Commercial Office/Residential on the Future Land Use Map of the CGMP. This district is generally used as a transition zone between more intense commercial areas and residential areas where a determination has been made that residential uses within this district are not appropriate.
COR-1 (Commercial Office/Residential District)	The COR-1 district is intended to implement the CGMP policies for lands designated Commercial/Office Residential on the Future Land Use Map of the CGMP. This district is generally used as a transition zone between more intense commercial areas and residential areas, particularly in areas that were originally developed as residential but where a gradual conversion to transitional, nonresidential and mixed uses is warranted.
COR-2 (Commercial Office/Residential District)	The COR-2 district is intended to implement the CGMP policies for lands designated Commercial/Office Residential on the Future Land Use Map of the CGMP. This district is generally used as a transition zone between more intense commercial areas and residential areas.

Staff recommendation:

Staff recommends zoning district change from A-1A to COR-1. The decision on the appropriate zoning depends on the final decision for the future land use designations on the property. The proposed zoning district COR-1 implements the future land use designation proposed for assignment on the Future Land Use Map.

Permitted Uses:

Below are excerpts from Article 3 of the Land Development Regulations, Martin County Code including the permitted use schedule for the existing and proposed zoning districts. Lands zoned in accordance with this Division shall be limited to the uses indicated as permitted in Table 3.11.2. The "P" indicates that the use is permitted within that zoning district provided that the use can be developed in accordance with, the requirements set forth in Divisions 3 and 4 and all other applicable requirements of this Article and the Land Development Regulations.

Standards for Amendments to the Zoning Atlas

1. The Comprehensive Growth Management Plan (CGMP) requires that Martin County shall rezone individual parcels to the most appropriate zoning district consistent with the Land Development Regulations pursuant to Policy 4.4A.1., CGMP, Martin County, Fla. (2016).
2. The Martin County Land Development Regulations (LDR), Article 3, Section 3.2.E.1. provides the following “Standards for amendments to the Zoning Atlas.”

The Future Land Use Map of the CGMP (Comprehensive Growth Management Plan) establishes the optimum overall distribution of land uses. The CGMP also establishes a series of land use categories, which provide, among other things, overall density and intensity limits. The Future Land Use Map shall not be construed to mean that every parcel is guaranteed the maximum density and intensity possible pursuant to the CGMP and these Land Development Regulations. All goals, objectives, and policies of the CGMP shall be considered when a proposed rezoning is considered. The County shall have the discretion to decide that the development allowed on any given parcel of land shall be more limited than the maximum allowable under the assigned Future Land Use Category; provided, however, that the County shall approve some development that is consistent with the CGMP, and the decision is fairly debatable or is supported by substantial, competent evidence depending on the fundamental nature of the proceeding. If upon reviewing a proposed rezoning request the County determines that the Future Land Use designation of the CGMP is inappropriate, the County may deny such rezoning request and initiate an appropriate amendment to the CGMP.

3. The Martin County Land Development Regulations (LDR), in Section 3.2.E.2., provides the following “Standards for amendments to the Zoning Atlas.” In the review of a proposed amendment to the Zoning Atlas, the Board of County Commissioners shall consider the following:
 - a. ***Whether the proposed amendment is consistent with all applicable provisions of the Comprehensive Plan; and,***

Please see the staff report for CPA 19-9, Realty Trust Parcels Future Land Use Map Amendment.

The report discusses compatibility with the Martin County CGMP and recommends COR future land use designation. COR-1, COR-2 and CO zoning districts are the only standard zoning districts that implements COR future land use designation. However, COR-1 and COR-2 are the only ones that allow residential uses.

COR-1, which is the applicant's request, allows 5 units per acre while COR-2 allows 10 units per acre. All designations are consistent with the CGMP and with adjacent parcels.

b. Whether the proposed amendment is consistent with all applicable provisions of the LDR; and,

The site and the requested COR-1 zoning district implements the proposed COR future land use category pursuant to the requirements and standards of the LDR. The site meets the minimum lot width and minimum lot size for the COR-1 zoning district. Any site plan proposed on the 9.54 acres (415,562.4 sq. ft.) must comply with all applicable land development regulations.

c. Whether the proposed district amendment is compatible with the character of the existing land uses in the adjacent and surrounding area and the peculiar suitability of the property for the proposed zoning use; and,

COR-1 zoning district implements the proposed COR future land use. COR-1 provides potential office space, limited goods/services and/or residential options in accordance with the CGMP policies. The subject site is located near a signalized intersection of 2 major roadways and is adequately sized to provide required buffers and ensure compatibility with the adjacent residential uses.

d. Whether and to what extent there are documented changed conditions in the area; and,

The growth in the area, particularly the surrounding institutional and commercial uses, and public infrastructure improvements, has altered the character of the area such that the proposed request is now reasonable and consistent with area land use characteristics. There have been some zoning changes in the area. The future land use map amendments discussed in Section 1.4 of the staff report for CPA 19-9 identifies the changes to the Future Land Use Map since 1982 to parcels near the subject site. The rezonings listed below facilitate the development of vacant land consistent with the adopted Future Land Use Map. See Figure 1, which shows all the past zoning resolutions in the area nearby the subject parcel.

1. **Resolution 08-7.5:** Zoning amendment, where the lot was changed from A1-A to PUD for Ault Acres PUD
2. **Resolution 17-7.23:** Zoning amendment, where a lot was changed to COR-2.
3. **Resolution 10-8.1:** Change in zoning classification to PS-1 on a lot
4. **Resolution 17-7.25:** Zoning amendment, where a lot was changed to RE-1/2A.
5. **Resolution 11-8.11:** Zoning amendment that changing lot from A1-A to RE-2A

Figure 1, where the subject site is in blue and parcels marked white had rezonings

- e. Whether and to what extent the proposed amendment would result in demands on public facilities; and,*

The property is located in the heart of the Primary Urban Service District and all required public facilities and services are in place or will be available to support future development in accordance with the COR-1 zoning district.

- f. Whether and to what extent the proposed amendment would result in a logical, timely and orderly development pattern which conserves the value of existing development and is an appropriate use of the county's resources; and,*

The change in future land use is in direct response to the pattern of growth and the investment in public facilities and services that has occurred since the CGMP was adopted. The proposed request will conserve and enhance the value of existing developments and will support a reasonable mix of land uses in the area, while using the county's resources efficiently and economically.

Please refer to Figure 2 below, which shows the proposed zoning atlas.

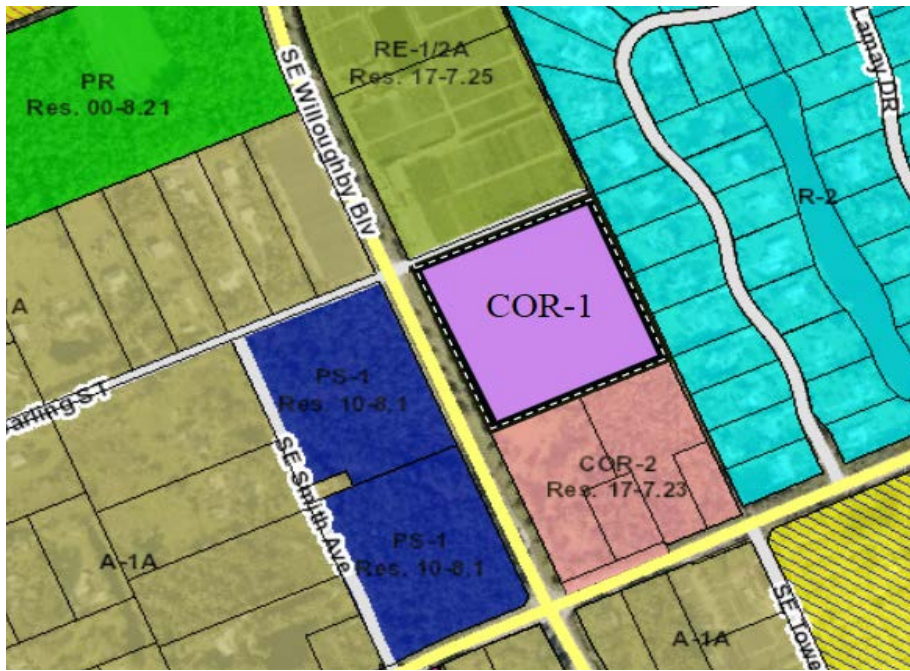

Figure 2, Proposed Zoning District, COR-1 (Commercial Office/Residential)

g. Consideration of the facts presented at the public hearings.

CPA 19-9 and this concurrent rezoning have not been presented at a public hearing yet.

C. Staff recommendation

The specific findings and conclusion of each review agency related to this request are identified in Sections F through T of this report. The rezoning process does not include a site plan review; therefore departments related to site plan review were not included in this rezoning staff report. The current review status for each agency is as follows:

Section	Division or Department	Reviewer	Phone	Assessment
F	Comprehensive Plan	Maria Jose	288-5930	Pending
G	Development Review	Maria Jose	288-5930	Pending
S	County Attorney	Krista Storey	288-5443	Review Ongoing
T	Adequate Public Facilities	Maria Jose	288-5930	Exempt

The choice of the most appropriate district for the subject property is a policy decision the Local Planning Agency (LPA) and the Board of County Commissioners (BCC) is asked to consider based on the “standards for amendments to the zoning atlas” provided in Section 3.2.E.1., Land Development Regulations (LDR), Martin County Code (MCC).

D. Review Board action

A review and recommendation is required on this application from the Local Planning Agency (LPA). Final action on this application is required by the Board of County Commissioners (BCC). Both the LPA and the BCC meetings must be advertised public hearings.

Unresolved issues:

Item #1:

Compatibility with the Future Land Use Map. The Growth Management Department staff has reviewed the Future Land Use Map Amendment in a separate report. Should the proposed change to the Future Land Use Map be adopted, the proposed COR-1 zoning district would correctly implement the respective Commercial Office/Residential (COR) Future Land Use designation.

G. Determination of compliance with land use, site design standards, zoning, and procedural requirements - Growth Management Department

Unresolved issues:

No site plan has been proposed. See Section F. above.

Additional Information:

Changes to the zoning atlas do not authorize any development activity. Criteria associated with this area of review are applied in conjunction with site plan review processes. Any specific department issues will be addressed at such time as development of the subject site is proposed.

(2016). Exempted development will be treated as committed development for which the County assures concurrency.

Examples of developments that do not create additional impact on public facilities include:

- A. Additions to nonresidential uses that do not create additional impact on public facilities;
- B. Changes in use of property when the new use does not increase the impact on public facilities over the pre-existing use, except that no change in use will be considered exempt when the preexisting use has been discontinued for two years or more;
- C. Zoning district changes to the district of lowest density or intensity necessary to achieve consistency with the Comprehensive Growth Management Plan;
- D. Boundary plats which permit no site development.

Rezoning Application

APPLICATION JUSTIFICATION**1.0 Justification Statement for Rezoning Application from A-1 to COR-1**

Section 3.2.E. of the Land Development Code provides the following criteria for amending the zoning maps. (Please note that the language *italicized* is actual language from the Land Development Code. Justification for the proposed change and applicant's responses are provided within the "boxed-in" sections that follow.)

Section 3.2.E. Standards for amendments to the Zoning Atlas.

1. The Future Land Use Map of the CGMP establishes the optimum overall distribution of land uses. The CGMP also establishes a series of land use categories which provide, among other things, overall density and intensity limits. The Future Land Use Map shall not be construed to mean that every parcel is guaranteed the maximum density and intensity possible pursuant to the CGMP and these Land Development Regulations. All goals, objectives and policies of the CGMP shall be considered when a proposed rezoning is considered. The County shall have the discretion to decide that the development allowed on any given parcel of land shall be more limited than the maximum allowable under the assigned Future Land Use Category; provided, however, that the County shall approve some development that is consistent with the CGMP, and the decision is fairly debatable or is supported by substantial, competent evidence depending on the fundamental nature of the proceeding. If upon reviewing a proposed rezoning request the County determines that the Future Land Use designation of the CGMP is inappropriate, the County may deny such rezoning request and initiate an appropriate amendment to the CGMP.

2. In the review of a proposed amendment to the Zoning Atlas, the Board of County Commissioners shall consider the following:

a. Whether the proposed rezoning is consistent with all applicable Provisions of the CGMP;

The requested rezoning from A-1, Small Farms District, to COR-1, zoning district, which allows up to 5 units per acre, implements the requested Commercial Office Residential future land use category. The proposed zoning provides a reasonable land use transition from the more intense uses along Willoughby Blvd. and at the intersection of Salerno Road. It is consistent with the CGMP policies for allocating Commercial Office Residential future land use and with all applicable provisions of the Comprehensive Growth Management Plan including land use transition and buffering policies.

b. Whether the proposed rezoning is consistent with all applicable provisions of the Martin County Land Development Regulations (LDR);

The requested COR-1 zoning district implements the proposed Commercial Office Residential future land use category pursuant to the requirements and all applicable provisions of the Martin County Land Development Regulations.

Rezoning Application

- c. Whether the proposed zoning district is compatible with the character of the existing land uses in the adjacent and surrounding area and the peculiar suitability of the property for the proposed zoning use;*

The COR-1 zoning district will provide potential office space, limited goods and services and/or alternative housing in accordance with CGMP policies. The site is located near a signalized intersection of 2 major roadways and is adequately sized to provide required buffers and ensure compatibility with the adjacent residential uses.

- d. Whether and to what extent there are documented changed conditions in the area;*

The growth in the area, particularly the surrounding institutional and commercial uses, and public infrastructure improvements, has altered the character of the area such that the proposed request is now reasonable and consistent with area land use characteristics.

- e. Whether and to what extent the proposed zoning would result in demands on public facilities;*

The property is located in the heart of the Primary Urban Service District and all required public facilities and services are in place or will be available to support future development in accordance with the COR-1 zoning district.

- f. Whether and to what extent the proposed zoning would result in a logical, timely and orderly development pattern which conserves the value of existing development and is an appropriate use of the county's resources;*

The change in future land use is in direct response to the pattern of growth and the significant investment in public facilities and services that has occurred since the Comprehensive Growth Management Plan (CGMP) future land use plan was originally adopted in 1982. The proposed request will conserve and enhance the value of existing development and provide equitable treatment to the property owner consistent with CGMP policies, while furthering CGMP policies that support a reasonable mix of land uses and the efficient and economical use of the county's resources.

2.0 Physical Characteristics of the Site.

The site is composed of 2 separate lots of record, each approximately 5 acres in size. Both parcels were previously used as single family homesites and retains primary and accessory structures that will be demolished as part of any future redevelopment plans. The parcels are legally access by SE Darling Street, an unpaved stabilized road along the north property line, which is a designated "open road". The easternmost parcel includes an approximately 3-acre manmade lake along the eastern boundary of the property. Both parcels have been cleared of native habitat. Some isolated pine trees remain and some areas are infested with exotic plant species, namely Brazilian pepper and melaleuca trees. Based on a preliminary site evaluation,

Rezoning Application

no natural wetland habitat or native upland habitat occurs on the property and the site has little or no potential for listed species.

2.1 Compatibility with Surrounding Uses.

The property is located north of Salerno Road with direct frontage on Willoughby Boulevard to the west and Darling Street to the north. Existing single-family home sites on approximately one-acre lots occur to the east (Woodlands Subdivision). In 2017, the future land use/zoning on the property to the north (across Darling Street) was changed from Rural Density to Estate Density/RE-1/2A (CPA 17-8, Fernlea) and the future land use/zoning on the property to the south was changed from Rural Density to Commercial Office Residential/COR-2 (CPA 17-1, VNA). The proposed change to Commercial Office Residential and COR-1 zoning, which allows up to 5 units per acre is compatible with the COR-2 zoning on the property to the south and creates a reasonable land use transition from the residential properties to the north and east.

Required landscape buffers between commercial and residential uses and compliance with density transition zone policies will ensure compatibility with the surrounding single-family home sites per *CGMP Policy 4.9E.1(1)* as identified below. The site is physically suited for buffering due to its size and the existing manmade lake that occurs along the eastern boundary adjacent to the existing single-family home sites.

LAND USE CHANGE ANALYSIS

TRIP GENERATION

Existing Future Land Use

The existing future land use (FLU) is Rural Density. The development potential of the land is up to 0.5 single family dwellings units per acre). The maximum development potential of the land with respect to traffic is 5 single family dwelling units.

The trip generation was projected based on the formulas in the Institute of Transportation Engineers' (ITE) report *Trip Generation (10th Edition)* and use Land-Use 210 (Single Family Detached). The existing FLU has a trip generation potential of 66 daily, 8 AM peak hour (2 in/6 out), and 6 PM peak hour (4 in/2 out) trips.

Proposed Future Land Use

The proposed FLU is Commercial Office/Residential (COR) and the maximum development potential of the land is 166,225 SF of Medical Office use based on the comprehensive plan's maximum building coverage of 40 percent. Medical office use generates more trips than commercial office or residential use; therefore, use of medical office provides a conservative analysis.

The trip generation was projected based on the Institute of Transportation Engineers' (ITE) report *Trip Generation, 10th Edition*. A 10 percent pass-by capture rate was applied to the trip generation based on Martin County's Impact Fee Study Technical Report, 12/2012, Walter H. Keller, Inc. The proposed FLU has the net maximum potential to generate 5,669 daily, 316 AM peak hour (247 in/69 out), and 509 PM peak hour (142 in/367 out) trips.

Net Impact

The difference between the maximum trip generation potential of the existing future land use and the proposed future land use was examined to determine the maximum (worst case/conservative) impact to the existing and future roadway network. Table 2 displays the resulting trip generation. The resulting change is 5,603 daily, 308 AM peak hour (245 in/63 out), and 503 PM peak hour (138 in/365 out).

TRAFFIC DISTRIBUTION

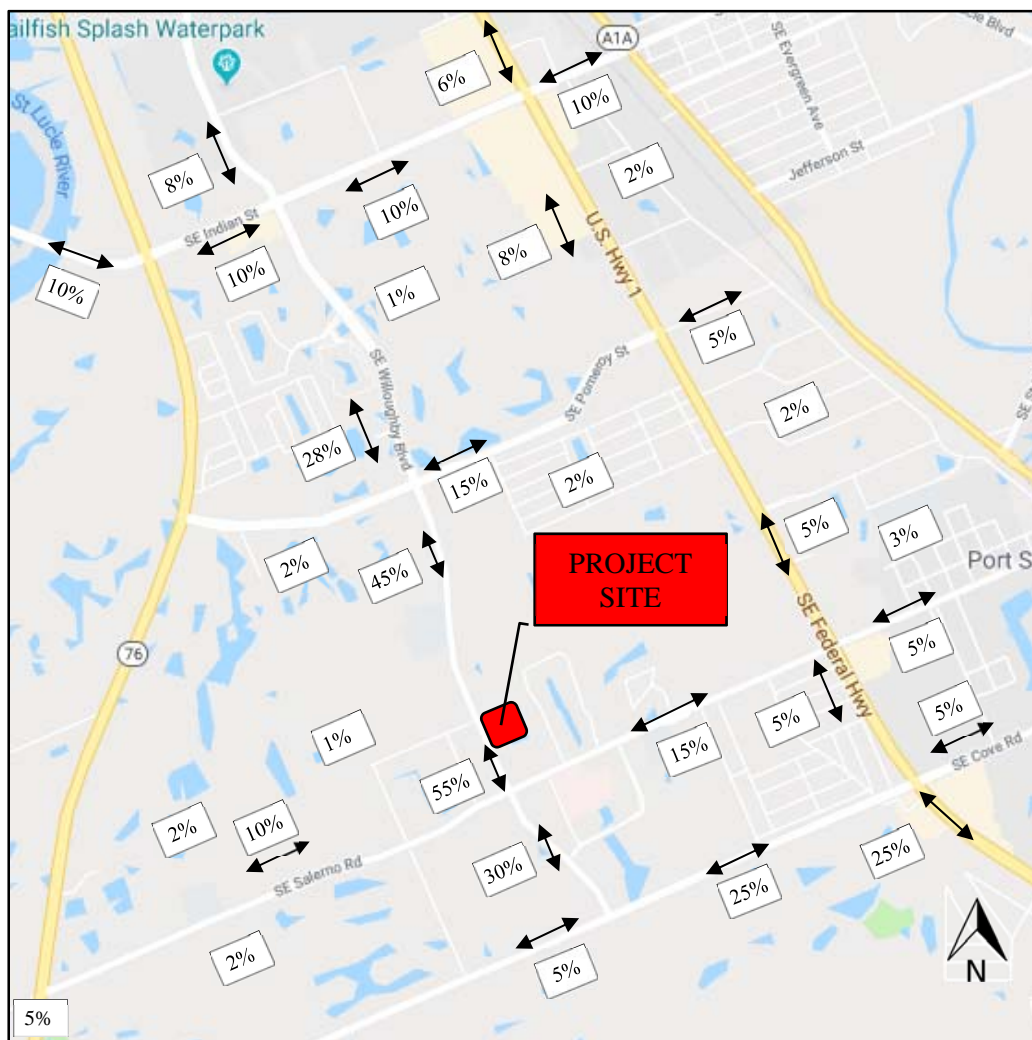

Traffic distribution and assignment was determined using engineering judgment, trip lengths based on the uses and from a review of the roadway network. The overall distribution is summarized by general directions and is depicted below:

NORTH	-	25 percent
SOUTH	-	30 percent
WEST	-	15 percent
EAST	-	30 percent

TRAFFIC ASSIGNMENT

The distributed external trips for the project were assigned to the roadway network. The project assignment is illustrated in Figure 2.

Figure 2. Traffic Assignment

SIGNIFICANCE

SIGNIFICANT IMPACT

A project significantly impacts a facility if its peak hour trips use more than two percent (2%) of a roadway's capacity (MC Article 5, Division 3. Traffic Impact Analysis). The project's traffic assignment and net external trips were utilized to determine the number of project trips on each road segment. Road capacities from Martin County's Roadway Inventory report were utilized in the study. In order to determine the project significance, the project's trips were divided by the roadway segment capacity. The roadway capacities and the project significance are shown in Table 3.

STUDY AREA

Based on Martin County Land Development Code (MC LDC) Article 5 Division 3 Section 5.64.C.5, the Radius of Impact for transportation concurrency is all links and aggregated segments or parts thereof, on the major road network on which the project traffic has an impact of at least 2 percent.

ANALYSIS

ROADWAY ANALYSIS

An analysis of the affected roadways was performed to determine the impacts of the land use change on the transportation system. The resulting increase in traffic on the roadway network is determined by multiplying the project traffic assignment times the peak hour increase in trips from the property. The increase in traffic resulting from the change were added to the traffic volumes obtained from the Long Range Transportation plan (LRTP 2040). Utilizing the 2018 Roadway Level of Service Inventory Report's Peak Hour Factor (K_{30}) and Directional Distribution (D_{100}), the LRTP traffic volumes were converted into the peak hour directional volumes, as shown in Table 4.

Table 5 shows that the 2040 roadway network is projected to operate acceptably with the increase in traffic from the property and that the increase in traffic from the future land use change will not adversely impact any roadway segments. Therefore the 2040 infrastructure is sufficient to accommodate the increased traffic demand from the property. Therefore, the proposed change is consistent with the Martin County Transportation Element of the Comprehensive Plan. Further analysis of the roadway will network will occur during the site planning process to ensure adequacy of the existing infrastructure.

ACCESS

The property has two potential points of access.

- Willoughby Boulevard
- Darling Street

Access to property has not been determined at this time and will be determined through the site planning process.

CONCLUSION

A future land use amendment is proposed on 9.54 acres at the southeast corner of SE Darling Street and Willoughby Boulevard, Martin County, Florida (Parcel IDs: 55-38-41-000-064-00011-1 and 55-38-41-000-064-00010-2). The amendment proposes to change the future land use from Rural Density to Commercial Office/Residential (COR).

All of the significantly impacted roadways are projected to operate acceptably in 2040 with the increase in traffic from the property. Therefore the 2040 infrastructure is sufficient to accommodate the increased traffic demand from the property in the long-term time horizon. Decisions related to access will be decided during site planning. Further analysis of the roadway will network will occur during the site planning process to ensure adequacy of the existing infrastructure.

Good morning Kevin,

For Salerno Road from Willoughby Boulevard to US-1, you may use $K = .11$ and $D = .55$ to convert the 2040 LRTP model volumes to peak hour direction volume. With the Projected 2040 daily volumes equaling 11,830 this equates to a PHDV of 716.

WORKSHEET INSTRUCTIONS

1. General Information

Date: Enter worksheet completion date.

Contact name: Enter the contact information for the person who prepared the worksheet.

Local government: Enter your city or county

Potable water supplier and wastewater collection: If there are different suppliers for any proposed amendment areas, use additional work sheets.

2. Infrastructure Information

Permitted capacity of the water and wastewater treatment plant: obtain from the utility.

Distribution lines: indicate if distribution lines are available to serve the property. If not available, indicate who will fund the improvements and when the improvements will be completed.

Reuse distribution lines: Indicates if reuse distribution lines are available to serve the property.

If not available, indicate if they will be provided. If the lines are to be provided, indicate who will fund the improvements and when the improvements will be completed.

3. SFWMD Consumptive Use Permit (CUP) Information

CUP information: Obtain from the utility.

Allocations to other local governments: If the supplier provides water to other local Governments, enter the names of the other local governments and the supply allocation for each.

Reserved capacity: Enter the amount of potable water capacity currently encumbered for developments that are approved but not yet constructed. This could be the amount reserved under your concurrency management system, but may include other encumbrances.

4. Consumptive Use Analysis

Designated mgd or mgy: Indicate which unit of measure is used. The figures may be cited in units of either million gallons per year (mgy) or million gallons per day (mgd), but you must be consistent throughout the worksheet.

A. Current-year CUP allocation: Provide the annual groundwater withdrawal allowed under SFWMD-issued CUP for the current calendar year. If you receive water from another local government, enter the allocation established by agreement or by the secondary user CUP by SFWMD. It is important to consider the duration of the CUP and the CUP allocation in the last year of permit. If your CUP allocation is less in the final-year than in the current year, consider using the final year figure as a more conservation approach for planning purposes.

- B. Consumption in the previous calendar year: This figure may be taken from the EN-50 forms (SFWMD), from FDEP monthly operating reports, or from other acceptable documentation. Cite your source.
- C. Reserved capacity or growth projection: Enter an amount based on your reserved capacity or growth projection. Check which alternative you selected. Attach the calculation for the alternative selected.
- Reserved capacity: Enter the amount of potable water capacity currently encumbered for developments that are approved but not yet constructed. This could be the amount reserved under your concurrency management system, but may include other encumbrances. If your supplier provides water to other local governments, add the amount of the previous year's allocation that was not used.
- Growth projection: Enter the water use attributable to this year's growth and cite your data source(s). Sources for growth projections include the comprehensive land use plan, the CUP, the most current SFWMD water supply assessment, or the utility's water supply plan. If your supplier provides water to other local governments, include the amount of the previous year's allocation that was not used.
- D. Projected consumption: Attach a description of formulas, including figures and assumptions, used to derive this figure. This worksheet may be used to analyze individual amendments or multiple amendments. If using a single worksheet for multiple amendments, include the projected consumption for all amendments. If using more than one worksheet, provide a separate summary sheet with the cumulative total for all worksheets. The project consumption should be based on new growth attributable to the proposed amendment. If the proposed change is due to annexation, it is presumed to be new growth unless there are data and analysis that identify the annexation as existing development or as part of the growth projection entered on line C. If the annexation is presumed to be new growth, the projected consumption should be calculated based on the maximum development potential of the amendment area. If the proposed change is not due to annexation, calculate the difference in projected consumption based on the difference between the maximum development potential under the current designation and the proposed designation.
- E. Amount available for all other future uses: This line automatically calculates the amount available for all other future uses by subtracting lines B, C and D from A. If the amount in line E is zero or a negative number, explain how potable water will be made available for future development. For example a reuse system may be coming on line that will reduce per capita consumption of potable water.

Comprehensive Planning Facts. The Future Land Use Map is adopted as part of the County's Comprehensive Growth Management Plan and is one of the primary tools for managing land development. The Future Land Use designation of a parcel of land determines the general type of use allowed, as well as the maximum level of density or intensity allowed (such as the number of residential units per acre). The zoning regulations provide one or more zoning districts for implementing each Future Land Use designation. The zoning designation of a parcel of land determines, in more detail than the Future Land Use designation, what type and level of development may occur. A change to the Future Land Use Map requires three public hearings as follows:

1. Local Planning Agency (which makes a recommendation to the Board of County Commissioners).
2. Board of County Commissioners (to determine whether the proposed amendment should be transmitted to the Florida Division of Community Planning, the state land planning agency that oversees and coordinates comprehensive planning).
3. Board of County Commissioners (to determine whether the proposed amendment should be adopted).

Public involvement opportunities: All interested persons are invited to attend any or all of the above-described hearings and will have an opportunity to speak. All application files are available for public inspection during business hours at the address below. Written comments will be included as part of the public record of the application.
