from the "Slice of Life" Series  
30"H x 16"W x 36"L  
Cast Concrete, Polymer Resin, Wood, Wheels

## **Artist's Statement**

In order to understand and create with the 'who, what, why, when, where and how' of our lives; my artwork metaphorically explores through the juxtaposed themes of 'form & function' in nature, with 'pattern & purpose' in culture.

The sculptures tend to visually mimic aspects of both the scientific principles involved with taking geological core-samples and the anthropological process of archeological excavation.

The grouping submitted here for Continuum - are from the "Slice of Life" Series.

Like Haiku poetry that must speak to the 3 required elements of: perception, place and passage of time in a specific rhythmic format... Each of these works is a stand-alone 'bite-size' thought bubble that uses the 'life is a piece of cake' form as its vehicle of observation on mankind, location and a moment in time.

Most are one-of-a-kinds or are part of a limited grouping of 10 variations within a concept, while some others have become larger works.
