Explanation of scoring: Each member of the Selection Committee will evaluate each Proposal. Each Proposal will be considered individually and in the context of the other Proposals. Each member of the Selection Committee will award points for each criterion, except price. The points for price will be provided to the committee members by the Purchasing Division. All of the points for the 5 criteria will be added together to determine the total number of points that will be awarded to a Responsive Proposal by a Selection Committee member. The Responsive Proposal with the most points will be the highest ranked Proposal, as determined by that member of the Selection Committee. The Proposal receiving the second most points will be ranked second by that committee member, and so on until the committee member has ranked all of the Proposals.
