The subject property is located at the intersection of SE Fern Street and SE Lantana Ave in the Olympia Subdivision (Banner Lake), and the house is a repetitive loss property that has flooded at least 4-6 times in the past 20 years. Fern Street and Lantana Ave also flood in the same rain events, which impacts access for residents and emergency services. The most recent flood event occurred in September 2020. It also flooded in June/July 2020, when thirty inches (30”) of rainfall was experienced in Hobe Sound over a ten-day period, which amounts to almost half the yearly expected rainfall. While this was an extreme event, recent experience has indicated that our weather norms are changing.

There is no outfall from this location, and the elevation of the road and home make a gravity outfall impractical. The intent of purchasing this property is to remove the home and create a dry retention on the lot. The dry retention will provide for additional storage of stormwater, which will reduce the frequency and duration of flooding of the roadways.

On July 12, 2021 an Appraisal for the Market Value of the property was obtained. Renee McClain has been identified as the owner of the property. An “As-Is” contract for sale and purchase of the property will be executed, along with adequate time to obtain due diligence on the property prior to final acquisition.

Funding for this project will come from the American Rescue Plan Act of 2021 (“ARPA”) Funding.

Sec. 139.31 and 139.32, General Ordinances, Martin County Code, require that any conveyance of an interest in land to Martin County for any public purpose shall be accepted and approved by resolution of the Board of County Commissioners of Martin County.
