TITLE:

CRA SEPTIC TO SEWER PROJECT - RIO

EXECUTIVE SUMMARY:

Leo Repetti, Utilities Project Engineer will present information regarding the Rio Septic to Sewer project. This will include system design, construction scheduling, pricing and grant opportunities.

BACKGROUND/RELATED STRATEGIC GOAL:

Infrastructure is a priority in the Rio CRA area and the Rio Septic to Sewer project, when complete, will provide sewer access to all properties within the Rio CRA boundary via the Martin County Utilities (MCU) Connect to Protect grinder system program.

The Connect to Protect program was created to assist homeowners in converting from their onsite sewage treatment and disposal systems to the MCU sanitary sewer wastewater system. This program is intending to be a “one-stop shop” that streamlines the process for homeowners while providing financial incentives to connect. MCU will have licensed contractors install the grinder pump system at the home and connect to the system. MCU will fully maintain the grinder system in perpetuity.

LEGAL SUFFICIENCY REVIEW:

This item has been reviewed for legal sufficiency to determine whether it is consistent with applicable law, has identified and addressed legal risks, and has developed strategies for legal defensibility.

RECOMMENDED ACTION:

Hear the presentation.
